Ian Trent

Full-Stack Developer

Experience

SFP, Lafayette, IN — Web Developer Intern
March 2019 - Present

- Proposed and led the front-end development for rebranding the companies in-house content management system.
- Implemented client-side functionality for ecommerce sites utilizing Vue.js.
- Integrated client-side requests using REST APIs to send and retrieve data over a server.
- Collaborated with project manager, designers, and other developers to see projects through completion.
- Developed authorization middleware for email protected routes.
- Conducted testing to ensure consistency within the design and functionality of a website.

Side Projects

Decore — https://de-core.netlify.com/

Construct a layout that can be used as a bare-bones website starter template. Built with React, Redux, and Styled Components.

Moviac — https://moviac.iantrent.com

React application that allows users to search through hundreds of thousands of movies using TMDb API.

Education

Web Programming and Design
Purdue University, West Lafayette, IN
August 2017 - May 2021 (Expected)

Accomplishments

Academic Honors Student
Purdue University
