Ian Trent

Software Developer

Experience

Software Engineer Intern | Blue Radar Search
Remote — May 2020 to September 2020

- Automated deployment processes by implementing continuous integration and delivery using CircleCI on top of AWS Elastic Beanstalk environments.
- Integrated JSON Web Token based authentication for securely transmitting information between client and server as a JSON object.
- Designed and developed REST API endpoints for exposing data to client-side components.

Full Stack Developer Intern | SFP
West Lafayette, IN — March 2019 to Present

- Developed single-page applications (SPA) using techniques including routing, client-side templating, and consuming JSON-based RESTful APIs.
- Proposed and led the front-end development for rebranding the company's in-house content management system.
- Collaborated with project managers, designers, and other developers to see projects through completion.
